

NCERM2 Update

Progress

- Phase 1 – Method improvements has commenced looking at recent R&D and available data sets to improve the methods of erosion prediction
- Data availability – Consultants will soon contact Local Authorities to determine any locally held data. Not requested for supply at this stage, just availability of the data.

Coastal Group NCERM Lead Role

- Request for a lead in each Coastal Group (Local authority or EA staff) – please contact Ben Meredith by **24th June** ben.meredith@environment-agency.gov.uk
- Promote the NCERM2 project within their Coastal Groups
- Help ensure that Local Authorities & EA have seen the correct information from the NCERM2 project team
- Ensure the scope and deadlines of any requests are being adequately provided by the project team
- Provide an additional point of contact for members of the Coastal Group to raise concerns, share experience and seek assistance.
- The approach should ensure that all stakeholders have a contact that they feel comfortable in raising any issues regarding the NCERM2 project.
- NCERM Leads are not expected to resolve issues, supply further resources or assistance above their general expertise and knowledge, this responsibility rests with the NCERM2 project team
